

COASTER

Delivering Comfort

Move your world

SEAMLESS DRIVING EXPERIENCE

Smartly arranged controls make driving smoother and more focused, letting you enjoy the journey with confidence and ease.

Redesigned for ease of use
Climate control panel

The climate control panel provides excellent visibility and ease of use.

CD with AM/FM and USB
Audio System

Space for a binder and 1.5-liter
Plastic bottle

Front door packet

Hold 500ml plastic bottles
Cup holders

Suitable for passenger announcement
Microphone with Amplifier

Smartphone charging
Power outlet

COMFORT[™]

And Peace of Mind

● THE COASTER DELIVERS PASSENGERS TO THEIR DESTINATION IN COMFORT AND WITH PEACE OF MIND, WHEREVER THE JOURNEY LEADS.

With the toughness to operate as a working vehicle for extended periods without a break, even on unpaved roads, an open interior with excellent access and extensive safety features in case of the unforeseen, the Coaster will let passengers enjoy a comfortable and reassuring ride to their destination.

PROVIDING OCCUPANTS WITH A HIGH-STRENGTH CABIN.

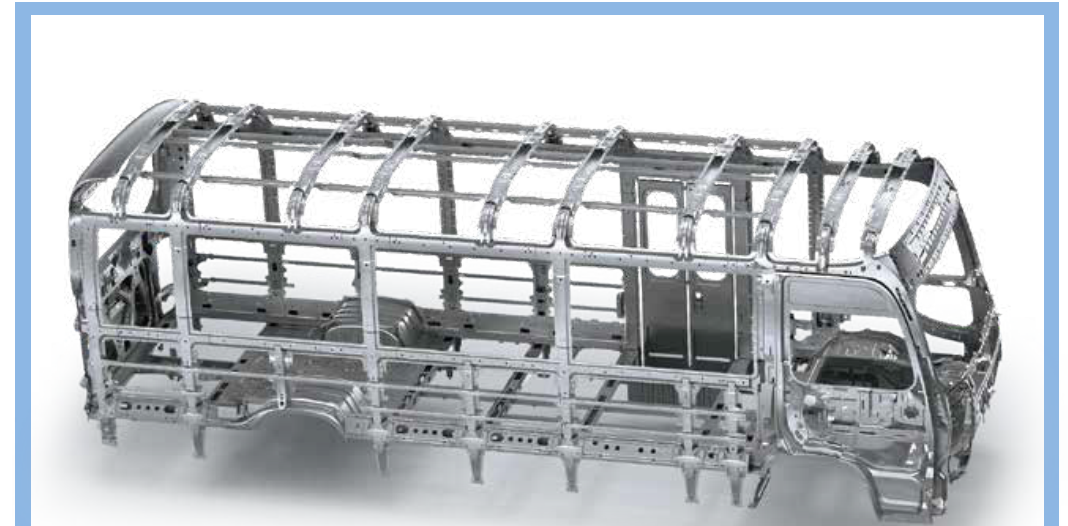

Toyota has enhanced the body rigidity and safety measures to help provide occupant protection.

Helping protect passengers in the event of an accident

Rigid body that complies with rollover regulations

To help provide peace of mind, the Coaster complies with the rollover regulations set out in UN-R66/02, a United Nations standard for evaluating the strength of bus bodies. After studying a range of body structures, the rigidity was enhanced to help create a safety zone in the vehicle's interior. The result is a high body rigidity which contributes to passengers' peace of mind.

Strong lightweight design

Circular frame/High-tensile steel sheeting

The circular frame structure connects the roof reinforcements, pillars and floor frame members to create a strong body. A center pillar near the front passenger's seat side further contributes to exceptional body rigidity for stable driving characteristics. In addition, optimizing placement of high-tensile steel sheeting contributes to body rigidity while reducing weight.

EXTENDING THE COASTER'S REPUTATION FOR EXCELLENT DURABILITY.

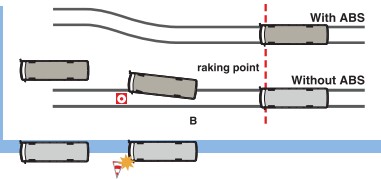

The Coaster withstands prolonged use even on unpaved roads and in harsh operating environments.

Withstanding unpaved roads

Frame structure

The Coaster's proven, highly durable, frame withstands prolonged use, even on unpaved roads.

Helping to avoid hazards

ABS (Anti-lock Braking System)

ABS helps to prevent the wheels from locking up on slippery roads, contributing to stable steering control.

Contributing to occupant safety

SRS airbags (Driver & Front Passenger)

The Coaster features SRS driver's and front passenger's excellent visibility and ease of use. airbags. In the event of severe frontal collision, together with the seat belt, they help reduce the impact to the driver's and front passenger's head and upper torso.*

Enhanced durability

Anti-corrosion steel sheeting

The extensive use of anti-corrosion steel sheeting for the body contributes to exceptional durability and strength over the long-term, even in harsh operating environments, helping to keep the vehicle operating with excellent reliability.

Strong body welds

Laser welding

The use of laser welding creates high-strength bonds between the body panels.

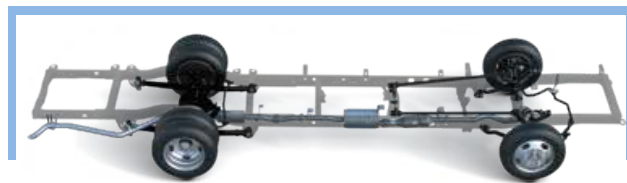

A peaceful space to enjoy conversation.

For a more relaxing interior

Reduced interior noise levels

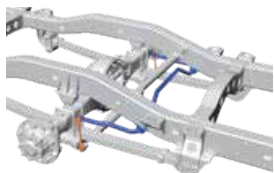

Enhanced noise insulation enables passengers to enjoy talking during their trip. The extensive use of noise-absorbing and noise-insulating materials, including the floor panel covering the transmission, dramatically reduces noise reaching the interior from the engine compartment and outside the vehicle, creating a pleasant environment in which passengers can hear one another clearly.

Minimizing passenger fatigue with a comfortable ride.

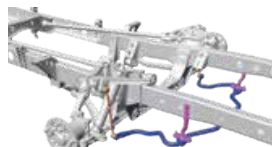

Rear suspension

Front suspension

Rear stabilizer

Front stabilizer

A stable ride enhances comfort

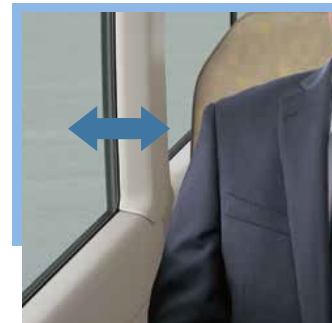

Stabilizers (Front/Rear)

Stabilizers at both the front and the rear, deliver a comfortable and stable ride; even during large turns. In addition, the damping force of the shock absorbers has been optimized. The stable vehicle stance while cornering contributes to excellent passenger comfort.

A roomy, spacious interior all roomy seats with ample space

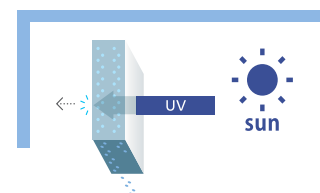

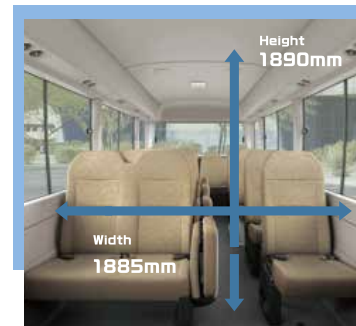

Spacious and relaxing

Roomy seats with ample space

Easy access

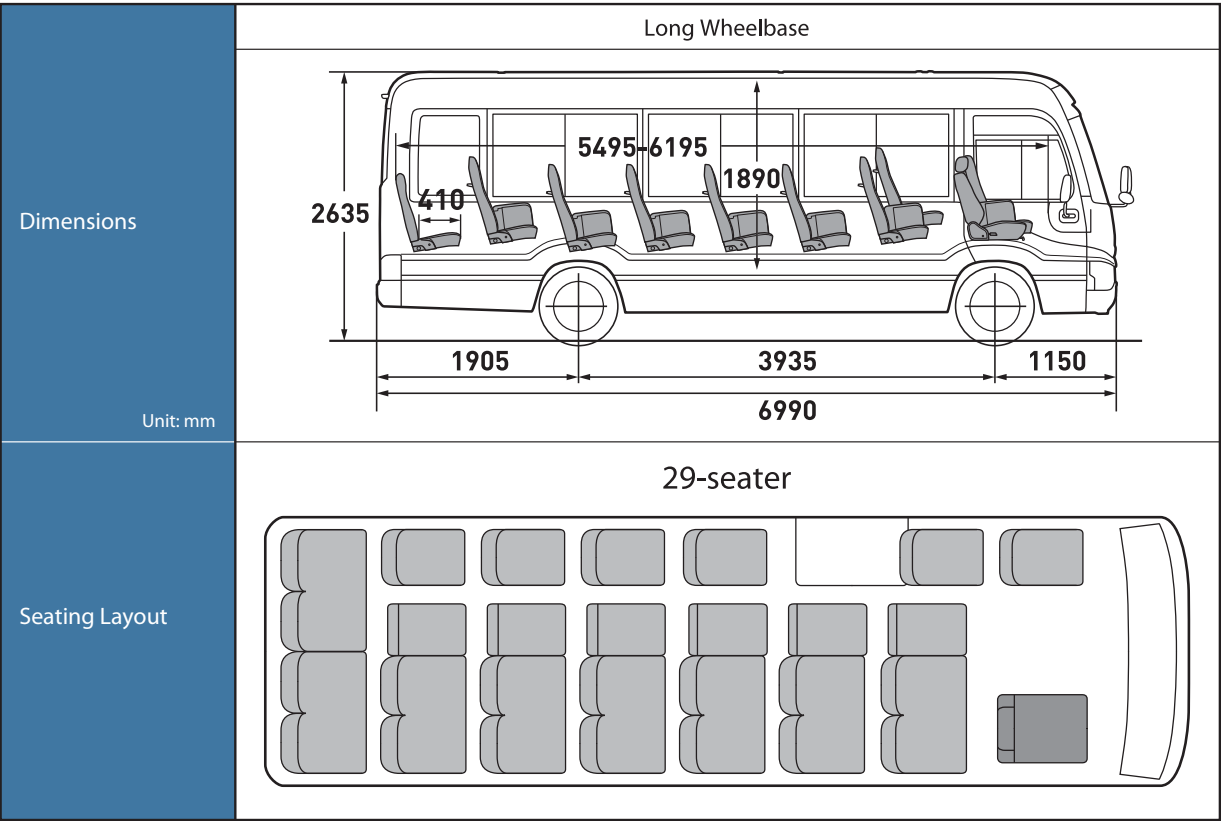

One of the most spacious interiors in its class

Protection from strong sunlight
UV-reducing green glass

Made for a spacious interior
Air conditioning
